

S M MAHAMUDUL HASAN

APPLIED AI ENGINEER | MACHINE LEARNING | DATA & AI

Ilford, London, UK | [+44 7448 652378](tel:+447448652378) | hasansust32@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Applied AI Engineer with 3+ years of experience turning machine-learning research into deployable services and enterprise systems. Delivered a private bilingual local-LLM service with FastAPI, Ollama and Docker Compose; achieved 85% job-placement prediction accuracy; and reduced manual pricing effort by 95% through Pricefx, Groovy and SAP integration. Co-authored three AI and machine-learning publications through IEEE and Springer while leading a five-member research team.

TECHNICAL SKILLS

AI and Machine Learning: Python, scikit-learn, TensorFlow, PyTorch, Keras, NLP, BERT, Word2Vec, LLM integration, classification, regression, clustering, feature engineering, hyperparameter tuning, model evaluation

LLM Applications and APIs: FastAPI, Ollama, REST APIs, JSON, NDJSON, Docker Compose, unit testing, API testing

Data and Analytics: SQL, R, Pandas, NumPy, exploratory data analysis, forecasting, statistical analysis, Matplotlib, Seaborn, Plotly, Power BI

Enterprise and Delivery: Pricefx, Groovy, SAP integration, CPQ, Git, GitLab, CI/CD, Jira, Scrum, Azure DevOps

PROFESSIONAL EXPERIENCE

Applied AI Engineer | [BritAI Labs](#) | Jan 2026 - Present

London, UK | Fixed-term contract

- Delivered a private bilingual local-LLM chat service with a 20-message context window and real-time JSON/NDJSON streaming by integrating FastAPI, Ollama, Docker Compose, health checks, conversation export and unit/API tests.
- Achieved 85% job-placement prediction accuracy by developing and evaluating an R-based model using forecasting and statistical-analysis techniques.
- Enabled comparison of three disease-intervention strategies by building a NetLogo agent-based simulation with configurable population and monitoring parameters.

PRICEFX ENGINEERING EXPERIENCE

Pricefx Configuration Engineer | [Eglobal Infotech](#) | Nov 2023 - Apr 2024 | Contract | Remote, United States | Client: Canidium

Pricing Software Engineer | [Ark Solutions](#) | Jun 2022 - Sep 2023 | Full-time | Remote, Australia

- Reduced manual pricing effort by 95% by configuring Pricefx pricing models in Groovy and integrating SAP source data for B2B manufacturing workflows.
- Reduced pricing-processing time by 25% by optimising Groovy-based rules and strategies with object-oriented design.
- Delivered three end-to-end B2B Pricefx implementations across three countries by translating requirements into pricing rules, CPQ workflows and order-management configurations.
- Built release-quality Pricefx configurations by debugging Groovy scripts, writing unit tests, and managing changes through GitLab and Jira/Scrum.

Machine Learning and NLP Research Apprentice | HAB Lab | Feb 2020 - May 2022

HCI AI and Blockchain Laboratory | Sylhet | On-site

- Co-authored three papers published by IEEE and Springer by leading a five-member research team and coordinating Git-based research workflows.
- Developed and evaluated machine-learning, deep-learning, and NLP models for classification, regression, clustering, sentiment analysis, text classification, and information extraction using scikit-learn, TensorFlow, and Keras.
- Improved model generalisation by treating missing values, engineering features, tuning hyperparameters and applying overfitting controls across experiments in Jupyter Notebook, Google Colab, and PyCharm.

EDUCATION

MSc in Artificial Intelligence and Robotics | University of Hertfordshire | Hatfield, UK | Sep 2024- Sep 2026

BSc in Computer Science and Engineering | Shahjalal University of Science and Technology | Sylhet, Bangladesh | Jan 2017 - Dec 2022
